2. Clear people and animals from the room before use – cover or remove fish tanks and pet bedding.
3. Make the area to be fumigated as smoke tight as possible by closing all windows etc.
4. Place canister(s) spaced out on the floor on a heat resistant surface e.g. a plate on top of a sheet of aluminium foil 50cm x 50cm.
5. Open canister(s) and light the fuse on the canister furthest from your exit point first, then light the next fuser and move towards your exit point. Close the door on exit, it is not necessary to seal the door with tape.
6. Leave for at least 2 hours but preferably overnight and then ventilate the room thoroughly.
