

# SX biokil

SX Biokil is used to control the disease organisms associated with pests (ie. treatment of Wells Disease, Canine Parvovirus). It is intended to be used in areas where persons may come into contact with bird droppings, feathers, nesting materials and where birds nest or roost.

This product will kill bacteria, fungi protozoa, rickettsiales and viral organisms associated with birds which are related to diseases which can be transferred by pest birds to humans or other animals. This product is designed to protect workers whose work involves cleaning up and removal of bird droppings. Deposits considered to be hazardous to health and defined as "statutory nuisances" under the Environmental Protection Act 1990 Part III need to be treated to remove the risk to other persons or animals who might be affected by contractor activities.

#### directions for use

**General Biocide:** Dilute 100ml per 5 litres of clean water and apply by coarse spray, mop or wipe. this should be applied to surfaces on which birds are known to land, nest or roost to protect workers operating on such surfaces.

**Removal of Droppings:** Dilute 100ml per 5 litres of clean water and apply over droppings by coarse spray prior to clean up operations. When digging out spray each exposed layer to keep down dust and kill organisms.

**For dead birds, collected nests and other materials** dilute 100ml with 1 litre of water and treat.

**Treatment of Equipment:** Dilute 100ml per 5 litres of clean water to clean equipment such as PPE; eg boots, gloves, face protection etc and tools; eg as spray equipment, shovels, bins etc

Following clean all surfaces should be sprayed with a dilution of this product (100ml per 5 litres)

# SXRANGE

## SXRANGE

#### Instructions for use

Place a known amount of clean water into a suitable container (eg bucket) or spray tank.

Add the appropriate amount of SX Biokil (see directions for use) and mix.

To use autodoser: remove cap from bottle, Gently squeeze the bottle to fill the upper dose reservoir to the required amount (Full = 25ml)

Empty reservoir into container and repeat if necessary to achieve required dose.

Replace cap immediately after use.

For spray applications apply product thoroughly to surface but try to eliminate run off.

Care should be taken to prevent run-off this product to other areas of the site.

Whilst this product should be safe to use on most surfaces it is advisable to try on small areas first, especially with fabrics or delicate surfaces.

#### precautions

Irritating to eyes and skin

Wear suitable protective clothing, gloves and eye/face protection when handling the concentrate.

Do not mix with other chemicals.

Keep out of the reach of children. Keep container tightly closed.

After contact with skin, wash immediately with plenty of soap and water

In case of accident or if you feel unwell seek medical advice immediately (show label where possible).

Read health & safety data sheet for this product.

The Control of Substances Hazardous to Health (COSHH) 2002 may apply to the use of this product at work.
